### Acog Guidelines For Pap Smears

Screening includes cervical cytology (also called the Pap test or Pap smear) and, for some women, testing for human papillomavirus (HPV). How does cervical cancer occur? Cancer occurs when cervical cells become abnormal and, over time, grow out of control. The cancer cells invade deeper into the cervical tissue.

### Cervical Cancer Screening | ACOG

Repeat Pap test or co-test—A repeat Pap test or a repeat co-test (Pap test and a test for high-risk types of HPV) is recommended as a follow-up to some abnormal test results. These repeat tests may be done in 1 year or in 3 years depending on your initial test result, your age, and the results of previous tests.

### Management Guidelines - ASCCP

Screening Guidelines. The American Cancer Society (ACS), ASCCP, and the American Society for Clinical Pathology (ASCP) have released guidelines for the prevention and early detection of cervical cancer. The guidelines generally advise a reduction in the number of tests women get over their lifetime to better ensure that they receive the benefits of testing while minimizing the harms, and include a preference for co-testing using the Pap test and HPV test for women age ages 30 to 65.

### Guidelines - ASCCP

The American College of Obstetricians and Gynecologists is the premier professional membership organization for obstetrician-gynecologists. ### New Pap Smear Guidelines 2013 Acog

The new pap smear guidelines (2012) recommend that a woman's first pap smear should be when she is 21 years old and not before. Being sexual active does not change this recommendation. For women age 21 to 29, only "cytology testing," which looks for abnormal or unhealthy cells under a microscope, should be used.
