4.0 out of 5 stars Great autoguider and scope  
January 30, 2016 The orion autoguider and scope made a big difference in my long exposure astrophotographs. I did have a problem with the mount because it was too short from my scope (Celestron 1100 HD).

## **Autoguiding (Review)**

An autoguider is a digital camera with a CCD or CMOS detector at the focus of the guidescope or, in the case of an off-axis guider, at the focus of the imaging instrument after some of its light has been diverted by a small prism.

As for an autoguider, the Atik Titan works great for me with its cooling but that shouldn't be an issue in the UK. But I haven't found anything as good as a Lodestar X2. I have owned the Orion and QHY autoguiders mentioned but the Lodestar is a step or 2 above everything else.
