Earth's human population—which now surpasses 7.5 billion—continues to grow, with the scale of our towns and cities following suit. As our communities grow, the habitats of our fellow creatures—animals like tigers, elephants and even squirrels—are shrinking. Despite protected areas, it is now more difficult for animals around the globe to move between habitats in search of food and ...

The rigid outer shell of Earth is called the crust. There are two main kinds of crust-continental crust and oceanic crust. Just below the crust is Earth's mantle. The mantle differs from the crust both in composition and behavior. The mantle ranges in temperature from 100°C to 4000°C-much warmer than temperatures found in Earth's crust.
