Geopolitics: The Geography of International Relations. Saul Bernard Cohen. Now in a thoroughly revised and updated edition, this textbook examines the dramatic changes wrought by ideological and economic forces unleashed by the end of the Cold War. Saul Bernard Cohen, one of the world's leading political geographers, considers these forces in the context of their human and physical settings and explores their geographical influence on foreign policy and international relations.

Geopolitics: The Geography of International Relations ...

Within the context of international relations, geopolitics provides a framework for studying foreign policy, as well as for explaining and predicting the behaviors of international political actors based on geographical variables.

Geopolitics vs. Political Geography vs. International ...

Geopolitics, on the other hand, is an approach to international politics that insists on the significance of geographic territory and its resources. It represents the study of the geographic distribution of power among the states of the international system, paying particular attention to the rivalries of the major powers.

geopolitics - Geography

In academic circles, the study of Geopolitics involves the analysis of geography, history and social science with reference to spatial politics and patterns at various scales (ranging from the level of the state to international). The term was coined by Rudolf Kjellén, a Swedish political scientist, at the beginning of the 20th century.

GEOPOLITICS AND INTERNATIONAL RELATIONS

Geopolitics, analysis of the geographic influences on power relationships in international relations.

Geopolitics | political science | Britannica

Geopolitics is sometimes defined as the geographical dimensions of power (and hence seen as synonymous with political geography). It has tended to be concerned with international relations and in particular with the geostrategic concerns of major powers.

Geopolitics - an overview | ScienceDirect Topics

At the level of international relations, geopolitics is a method of studying foreign policy to understand, explain and predict international political behavior through geographical variables. These include area studies, climate, topography, demography, natural resources, and applied science of the region being evaluated.
