In terms of possible adverse effects on overall financial and economic stability, the literature has highlighted that risk-sharing through global banking has two sides. On the one hand, local risks are more diversified internationally and global banks can support their foreign affiliates during periods of stress in the host market.

The financial crisis of 2007–2008, also known as the global financial crisis (GFC), was a severe worldwide financial crisis. Excessive risk-taking by banks combined with the bursting of the United States housing bubble caused the values of securities tied to U.S. real estate to plummet, damaging financial institutions globally, culminating with the bankruptcy of Lehman Brothers on September ...
