The rattle serves as a warning for predators of the rattlesnake. The rattle is composed of a series of hollow, interlocked segments made of keratin, which are created by modifying the scales that cover the tip of the tail. The contraction of special "shaker" muscles in the tail causes these segments to vibrate against one another, making the rattling noise (which is amplified because the ...

David Hume (Stanford Encyclopedia of Philosophy)

Philosophy answers to our need of forming a complete and unitary conception of the world and of life, and as a result of this conception, a feeling which gives birth to an inward attitude and even to outward action. But the fact is that this feeling, instead of being a consequence of this conception, is the cause of it. Our philosophy—that is ...

Concepts such as disease and health can be difficult to define precisely. Part of the reason for this is that they embody value judgments and are rooted in metaphor. The precise meaning of terms like health, healing and wholeness is likely to remain elusive, because the disconcerting openness of the outlook gained from experience alone resists the reduction of first-person judgments (including ...
